

First Star

(C) Bellinda McArdle 2013

About the Song

Lots of us like to wish on the first star we see in the sky at night. I wondered what the star might say if it could write a song.

I'm about hiding in the night sky
I wait all day to be the first to shine
No shooting for me I don't need
the rest of the galaxy
I'm the brightest light and I keep your wish with me

Star Light Star Bright –
I'm there looking for you every night
So I can hear the silent dreams you speak

I'm about hiding in the night sky
You can trust I'm always there to find
I'm bound with gravity, I am
Nothing but energy
I am the hope you need beyond the trees

Star Light Star Bright –
I'm there looking for you every night
So I can hear the silent dreams you speak
You wish you may – you wish you might
I've lived a billion years and so I know it's right
To say you are just where you need to be

Ah -h—Ah-h -h -h -h
A-h—Ah

CHORUS
